⚠ WARNINGS AND CAUTIONS

- Risk of fire and electrical shock, products should be installed in accordance with appropriate electrical codes and regulations.
- The product shall be used together with an upstream air-gap switch.
- If you are unsure about any part of these instructions, consult a licensed electrician.
- **DO NOT USE WITH AN IN-WALL DIMMER.** Only Dimmable via the mobile APP.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC CAUTION

Any changes or modifications to this unit not expressly approved by the manufacture could void the user's authority to operate the equipment.

Mobile APP Set-up

- Open the Smart Life App, click Register to create an account & login.
- If already registered, login.

Step 3 Selecting the Device

- Click 'Add Device' or the '+' in the top right-hand corner;
- The light should automatically appear to add. If not, you can follow the the next steps.
- Click 'Lighting' then 'Light Source (Wi-Fi)' to enter the device connection interface.

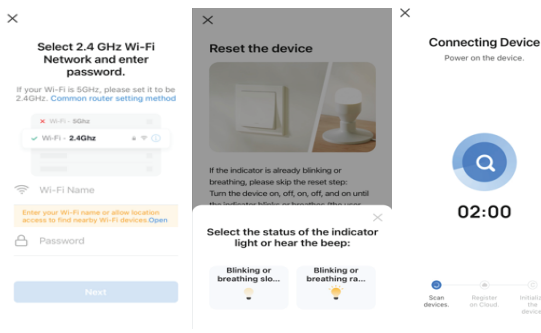

Step 4 Mobile phone connection

Step 4a EZ mode connection:

When the Slim Panel is on, switch the on/off switch 3 times (each interval within 1s), Off, On, Off, On, Off, On. The light will flash quickly (flash once every second), your device can connect to the light. The light will stop flashing once when the connection is successful. If there is no connection, device will exit network configuration mode after 3 min.

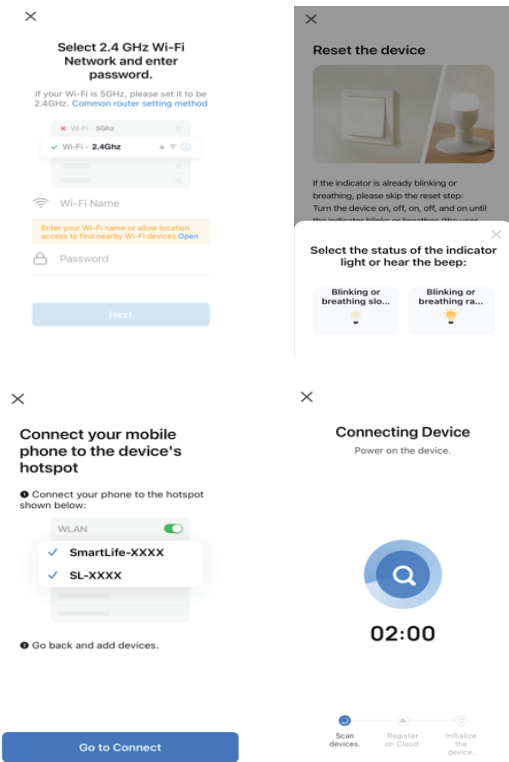

- Enter the Network Name & WiFi password for your home, click Next.
- Confirm the light is flashing,click device indicator is 'fast blinking (0.5S/time)'.
- Device will Connect.

Step 4b AP mode connection:

When the Slim Panel is flashing quickly; turn the light off. Repeat turn the on/off switch 3 times to make the light flash slowly. The light will flash slowly (flash once every 2-3s), your phone can connect to the light. The light will stop flashing once when the connection is successful. If there is no connection, the device will exit network configuration mode after 3 min.

- Enter the Network Name & WiFi password for your home and click Next.
- Confirm the light is flashing slowly. Click“Blinking or breathing slowly”
- Back out of the app and go to your device's Wifi settings. Connect to the light's WiFi hotspot:“Smartlife-XXXX”
- Return to the Smart Life App and wait for the connection to complete

- Click to enter the operation interface.

Mobile App Operation

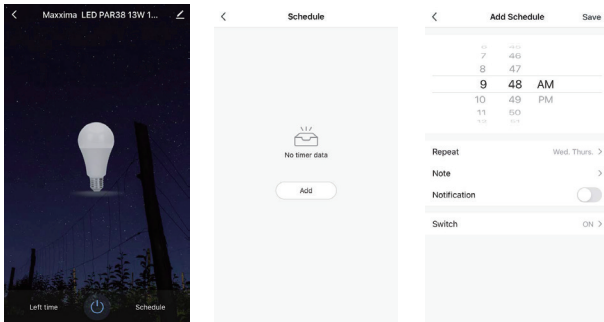

- Select White to adjust the CCT and to Dim.

- Select Color to adjust to the desired color, to Dim and adjust Contrast.

- Click Schedule to set a on or off function of the light at a certain time/day(s).

- Add schedule and then save. Repeat as desired.

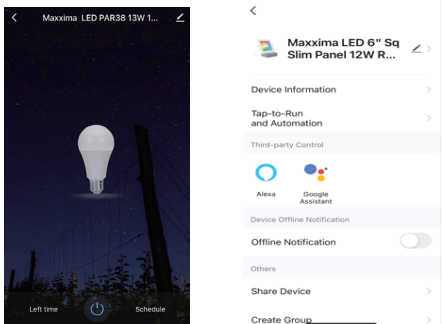

- Select Left Time to enable Countdown Timer when light is on. The time selected will automatically turn the light off after the desired time.

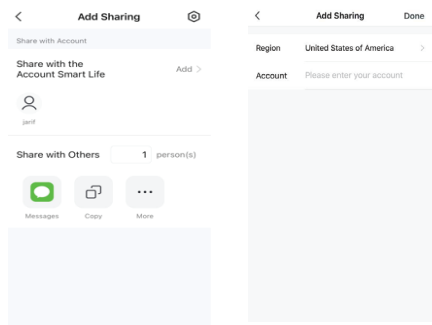

- After the light connection is completed, it can be shared to many people, that is, one light can be controlled by multiple Users.

- Click to enter the device details interface;

- Click 'Share Device' to enter the device sharing interface.

- Click 'Add Sharing', add the account you are willing to sharing.

- You may also share all devices in your account with another account

- Hey Google,turn on <device name>
- Hey Google,turn off <device name>
- Hey Google,is <device name> on/off?
- Hey Google,brighten/increase <device name>
- Hey Google,Dim/Brighten <device name> by 50%

Trouble-Shooting / Recommendations / Tips

- If the light is offline in the App, make sure the in-wall switch is in the On position. If not, turn on.
- Please check whether the light is connected with power, and your mobile device is connected to a 2.4GHz WiFi Network.
- Check the router. If the router is dual-band, make sure to select 2.4GHz network to add the light. Router Broadcast should be set to open. Also try disabling the 5GHz band temporarily on the router.
- Make sure the WiFi User Name and Password are correct.
- Make sure the light is within the range of the router signal. If not, try moving closer to the router. Check Wi-fi signal on the mobile device to make sure the signal is strong in that area or if it is weak.
- Check to see if the maximum number of devices/lights the router can handle has been reached. If so, remove a device/light and restart the router. If there is no Wi-fi connection, try restarting the light and/or restarting the router.
- If the device will not go into pairing mode, try the on/off sequence 4 or 5 times instead of 3 times. Also give a second or 2 longer delay between the on/off sequence.
- If the internet signal/connection from the internet provider is down, the light can still be controlled through the mobile device as long as both are connected to the same Network (Intranet).
- If the internet signal/connection is down from your router, this light has a backup bluetooth function that will allow you to control the lights from a certain distance. Ensure bluetooth is enabled on your device.
